VI. INVESTMENT CONSULTANT REPORT – *Marquette Associates*

Mr. Obed walked through the market environment and performance for the three Plans. He noted that 2022 has been a very tough year, but the Plan returns have been solid over the past couple of months.

Mr. Obed stated that for the Fixed Income asset class, November was a good month, but there has been year-long pressure in this asset class.

Mr. Obed noted the US Equity market was also up. Historically, we are used to seeing that when one asset class does well, another will do poorly. It is important to understand both the up and down markets and, when the market is pulling back, there will be pain in the portfolio.

The last time the cap study was done was 5 years ago. At this time, using current assumptions and assuming all assumptions are met in the future, the 35% cap would never be reached. If lower investment returns were used, the 35% cap is projected to be reached in 2035 assuming a 5.25% return, or in 2040 assuming a 7.0% return, again assuming all other assumptions are met.
